

NeuroRestorative Academy

Our Treatment Approach

NeuroRestorative Academy has served children and adolescents who have experienced traumatic brain injury (TBI) or neurological impairments. NeuroRestorative Academies provide dynamic learning opportunities in a supported environment. We have a low teacher-to-student ratio, ensuring personalized attention to each student. **We provide a supportive academic environment in which students feel included, proud and comfortable with who they are, preparing them for who they will become.**

Programs and Services

At our [NeuroRestorative Academy Clearwater, FL, program](#), we serve children and adolescents ages 8-18 from all over the United States. **Our program focuses on psychiatric residential treatment.** Individualized treatment plans begin with assessments from our skilled therapy team and evolve based on progress or needs. We offer students an array of personalized supports and services designed to promote their academic and rehabilitative success, including:

- Speech, physical and occupational therapy
- Group and family therapy
- Interactive Telehealth Services available
- Campus setting with school and recreational activities
- Thoughtfully designed residential environment
- Post-acute rehabilitation for ID/DD and other neurological impairments
- Behavior intervention development and programming
- Family inclusive rehabilitation services
- IEP planning/implementation

Program Outcomes

- Classroom behavior shaping to enhance academic readiness skills
